- Total revenues, pre-tax income, and diluted earnings per share (“EPS”) were all second quarter records and increased 8.5%, 37.1%, and 50.0% respectively
- First half total revenues, pre-tax income, and diluted EPS were records and increased 5.0%, 15.5%, and 23.6%, respectively
- The Company reiterates fiscal 2023 guidance for 5% to 7% revenue growth and 10% to 15% pre-tax income growth
- Through the fiscal first half of 2023, the Company returned \$33.3 million to shareholders through dividends and share repurchases

“We are pleased with our second-quarter results, including strong store traffic growth, which continues to significantly outpace reported national retail traffic, and double-digit growth in consolidated e-commerce demand. Our eighth consecutive quarter of record revenue results demonstrates the evolution of our business model leveraging the power and the broad appeal of the Build-A-Bear brand. Our digital transformation has further enabled us to expand the Company’s addressable market to include gifting and collectibles, with 40% of sales now generated by teens and adults,” commented Sharon Price John, President and Chief Executive Officer of Build-A-Bear Workshop. “We enter the second half of the year, with positive momentum, and expect to drive growth by the continued opening of corporate and partner-operated locations, a strong product pipeline, and impactful marketing campaigns, highlighted by the new heart-warming film featuring our multi-year best-selling holiday collection, ‘Glisten and the Merry Mission,’” concluded Ms. John.

Voin Todorovic, Chief Financial Officer of Build-A-Bear Workshop added, “With solid revenue growth, and both gross margin and store contribution margin expanding in the second quarter and for the first half of the year, we believe we are well positioned to deliver our third consecutive year of record results, leading us to reiterate our guidance for the year. Our year-to-date results further demonstrate Build-A-Bear's ability to consistently operate at a higher level of profitability, inclusive of the continued investment to support sustainable long-term profitable growth.”

2023 Outlook

The Company is reaffirming its fiscal 2023 outlook with expectations of delivering growth in total revenues and pre-tax income, as compared to fiscal year 2022.

For fiscal 2023, the Company continues to expect:

- Total revenues to increase in the range of 5% to 7%, with growth in its three operating segments
- Pre-tax income growth of 10% to 15%, surpassing 2022's record high
- To open 20 to 30 experience locations, through a combination of partner-operated and corporately-managed business models
- Capital expenditures in the range of \$15 million to \$20 million
- Depreciation and amortization of approximately \$13 million to \$14 million
- Tax rate to approximate 25%, excluding discrete items

While the Company notes that its fiscal 2023 is a 53-week year compared to a 52-week year in fiscal 2022, it expects to deliver growth in total revenues and pre-tax income versus the prior year exclusive of the projected benefit of the 53rd week. For reference, the additional week in fiscal 2023, which will be reflected in the Company's fourth quarter, is estimated to be \$7 million in total revenues with approximately 35% flow-through to EBITDA.

The Company's guidance considers a variety of factors ranging from anticipated ongoing inflationary pressures to the expected benefit of reduced freight costs. Additionally, the Company noted that its outlook assumes no further material changes in the macro-economic and geo-political environment, or relevant foreign currency exchange rates.

Note Regarding Non-GAAP Financial Measures

In this press release, the Company's financial results are provided both in accordance with generally accepted accounting principles (GAAP) and using certain non-GAAP financial measures. In particular, the Company provides historic income adjusted to exclude certain costs, which are non-GAAP financial measures. These results are included as a complement to results provided in accordance with GAAP because management believes these non-GAAP financial measures help identify underlying trends in the Company's business and provide useful information to both management and investors by excluding certain items that may not be indicative of the Company's core operating results. These measures should not be considered a substitute for or superior to GAAP results. These non-GAAP financial measures are defined and reconciled to the most comparable GAAP measure later in this document.
